RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 276 pages. Original publisher: Washington, D. C. : Dept. of the Army, U. S. Army Corps of Engineers, 2003 OCLC Number: (OCoLC)276988684 Subject: Hydraulic engineering -- United States -- Evaluation. Excerpt: . . . Hydraulics and Hydrology Capability Assessment Task Force Report August 2003 CHAPTER 2: BACKGROUND INFORMATION In accordance with the Task Force Charter ( Appendix A ), it is noted that Our ability to maintain technical expertise in the H and H field is critical to our continued support to the nation. The Civil Works program of the Corps is one of assessing and managing water in a natural or constructed environment to achieve national beneficial purposes as authorized by Congress. The technical professionals within the Corps that possess the requisite critical skills of assessing and managing water are the hydraulics and hydrology community. The military is concerned with water on bases and within the field of operation, and H and H skills are also important though not as critical as in Civil Works. Because hydraulics and hydrology capability is essential to healthy Civil Works and Military Programs, the Task Force was established to examine issues that are critical to the continued health of H and H in the Corps. What is Hydraulics and Hydrology Hydraulics and Hydrology ( H and H ) is a core technical expertise that forms the foundation of the Corps Civil Works program. Hydraulics and hydrology is a part of civil engineering practice in which applications of professional knowledge of hydrologic and hydraulic principles are key elements in water resources development and management decisions. The scope includes the natural and management processes affecting the water cycle from precipitation on the land surface through the ultimate return of water to the sea...
