

Simulation of Streamflow and Selected Water-Quality Constituents Through a Model of the Onondaga Lake Basin, Onondaga County, New York: A Guide to Model Application: Open-File Report 2008-1188

Filesize: 6 MB

Reviews

This publication is definitely not simple to begin on studying but quite fun to see. It really is full of knowledge and wisdom I am just effortlessly can get a satisfaction of studying a created pdf.
(Alfreda Bradtke)

SIMULATION OF STREAMFLOW AND SELECTED WATER-QUALITY CONSTITUENTS THROUGH A MODEL OF THE ONONDAGA LAKE BASIN, ONONDAGA COUNTY, NEW YORK: A GUIDE TO MODEL APPLICATION: OPEN-FILE REPORT 2008-1188

To save **Simulation of Streamflow and Selected Water-Quality Constituents Through a Model of the Onondaga Lake Basin, Onondaga County, New York: A Guide to Model Application: Open-File Report 2008-1188** eBook, make sure you access the web link beneath and download the ebook or gain access to additional information that are relevant to SIMULATION OF STREAMFLOW AND SELECTED WATER-QUALITY CONSTITUENTS THROUGH A MODEL OF THE ONONDAGA LAKE BASIN, ONONDAGA COUNTY, NEW YORK: A GUIDE TO MODEL APPLICATION: OPEN-FILE REPORT 2008-1188 ebook.

BiblioGov. Paperback. Book Condition: New. This item is printed on demand. Paperback. 42 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. A computer model of hydrologic and water-quality processes of the Onondaga Lake basin in Onondaga County, N. Y. , was developed during 2003-07 to assist water-resources managers in making basin-wide management decisions that could affect peak flows and the water quality of tributaries to Onondaga Lake. The model was developed with the Hydrological Simulation Program-Fortran (HSPF) and was designed to allow simulation of proposed or hypothetical land-use changes, best-management practices (BMPs), and instream stormwater-detention basins such that their effects on flows and loads of suspended sediment, orthophosphate, total phosphorus, ammonia, organic nitrogen, and nitrate could be analyzed. Extreme weather conditions, such as intense storms and prolonged droughts, can be simulated through manipulation of the precipitation record. Model results obtained from different scenarios can then be compared and analyzed through an interactive computer program known as Generation and Analysis of Model Simulation Scenarios for Watersheds (GenScn). Background information on HSPF and GenScn is presented to familiarize the user with these two programs. Step-by-step examples are provided on (1) the creation of land-use, BMP, and stormflow-detention scenarios for simulation by the HSPF model, and (2) the analysis of simulation results through GenScn. This item ships from La Vergne, TN. Paperback.
