OCLC Number: (OCoLC)61283991 Subject: Computer security -- Government policy -- United States -- Evaluation. Excerpt: . . . Our analysis of IG, agency, and GAO reports has shown that agencies have not always effectively implemented controls to allow only authorized individuals to read, alter, or delete data. Twenty-three of 24 major agencies had access control weaknesses. We identified weaknesses in controls such as user accounts, passwords, and access rights. For example, users created passwords that were common words. Using such words as passwords increases the possibility that an attacker could guess the password and gain access to the account. Also, agencies did not always deactivate unused accounts to prevent them from being exploited by malicious users. In addition, agencies have weaknesses in the controls that prevent unauthorized access to their networks. For example, at one agency, we found an excessive number of connections to the Internet. Each such connection could provide a path for an attacker into the agency's network. Agencies often lacked effective physical barriers to access, including locked doors, visitor screening, and effective use of access cards. Inadequate access controls diminish the reliability of...
