This could be due to their heavily built body structure and horns that are unlike any other land mammal. Two species of Rhino live in Africa and three Rhino species live in Asia. The Asian rhinoceroses are quite smaller than their African counterparts. These creatures, with their prehistoric looks, prefer the solitary life, which means they like to live by themselves. Sometimes you might see Rhinos charging trees or termite mounds. It is not because they are crazy, but more likely because of their weak eyesight. Surprising, isn't it? No wonder they rely on their sense of hearing, smell and of course their little friend, Oxpecker, who takes a free ride on them...

Reviews

This publication is amazing. It is definitely basic but shocks in the fifty percent of your publication. You won't feel monotony at anytime of your own time (that's what catalogues are for concerning if you question me).

-- Prof. Kirk Cruickshank DDS

This kind of book is every little thing and taught me to looking ahead of time and a lot more. I am quite late in start reading this one, but better than never. I found out this book from my dad and i encouraged this pdf to find out.
