Springer Dez 2000, 2000. Taschenbuch. Book Condition: Neu. 235x155x13 mm. This item is printed on demand - Print on Demand Titel. - There has been a phenomenal growth in autonomous business services, fuelled largely by the internet and e-business. New business architectures are emerging, in which an enterprise is configured as a dynamic network of components providing business services to one another. This is component-based business - 'plug-and-play' applied not to hardware and software, but to business relationships. Component-Based Business constitutes a radical challenge to traditional notions of strategy, planning, requirements, quality and change, and tries to help you improve how you think through the practical difficulties and opportunities of the component-based business. As this is a rapidly developing field, more up-to-date and detailed examples can be found on the website associated with this book: component-based-business.com, which also contains open forums in which your questions can be discussed. 'In this work so far, Richard challenges conventional thinking with a sometimes breathtaking series of lateral thoughts that are essential reading for the component architect, designer and their customer. Strongly recommended.' David Sprott, Principal Analyst, CBDi Forum 240 pp. Englisch.
